

TECHNICAL SUMMARY

Software Engineering | Machine Learning | Full-Stack Development | Python | Java | React | Cloud Computing | Data Analysis

EDUCATION

| Degree/Certificate                    | Institute/Board                    | CGPA/Percentage | Year         |
|---------------------------------------|------------------------------------|-----------------|--------------|
| B.Tech Computer Science & Engineering | KL University, Vaddeswaram, Guntur | 8.97 (Current)  | 2023-Present |
| Senior Secondary                      | Board of Intermediate Education    | 84.2%           | 2023         |
| Secondary                             | Board Of Secondary Education       | 10              | 2021         |

EXPERIENCE

- Ministry of New and Renewable Energy

Aug 2025 - Oct 2025

Research & Machine Learning Intern

Chennai, India

– Developed Python-based ML forecasting system for wind power generation scheduling. Implemented LSTM, Random Forest, and Linear Regression models for renewable energy prediction. Processed and analyzed large energy datasets using Pandas and NumPy to improve forecasting accuracy by 18%.
- Bluestock Fintech

Jun 2025 - Aug 2025

Frontend Developer

Remote, Pune(based), India

– Built React-based financial dashboard interfaces integrated with REST APIs. Developed responsive UI components improving platform usability and data visualization performance. Collaborated with backend teams to support secure and scalable fintech platform architecture.

PROJECTS

- Antariya

Dec 2025 - Present

Premium Embroidery E-Commerce Marketplace

Live site

– Independently designed and shipped a full-stack e-commerce platform - React frontend, secure auth, backend-integrated order workflows, fault-tolerant data layer. Zero team. Zero guidance. Just spotted the problem, built the solution, shipped it.
- Wind Power Forecasting AutoML System

Aug 2025 - Feb 2026

AI & ML Based Wind Power Forecasting Website + Research Paper

Live site

– Developed an end-to-end ML forecasting model in Python for wind power grid scheduling, improving day-ahead generation prediction accuracy by 18% and reducing scheduling error by 22% using LSTM, Random Forest, and Linear Regression models.
- AgentGuard

2025

AI Financial Fraud Detection & Audit System

Live site

– Developed a React-based interface for an AI-powered auditing platform designed to detect financial anomalies and compliance risks. Enabled streamlined access to government and personal audit data for fraud monitoring and financial transparency. Integrated frontend components supporting data-driven compliance analysis workflows.

TECHNICAL SKILLS

- Programming Languages:

C, C++, Java, Python, LaTeX, HTML5, CSS, JavaScript, TypeScript
- Technical Skills:

Full-Stack Web Development(Java, React), Database Management Systems(PostgreSQL, MySQL, MongoDB), Machine Learning(Intermediate)
- Software Engineering:

Data Structures & Algorithms, Object-Oriented Programming, CI/CD Pipelines, REST APIs, Secure Coding Practices
- Libraries & Frameworks:

React, Node.js, Pandas, NumPy
- Tools & Frameworks:

Git, MongoDB, VS Code, PostgreSQL, MySQL, IntelliJ IDEA, Overleaf, Android Studio
- Operating Systems:

macOS, Windows, Linux (Beginner)
- \* Elementary proficiency

CERTIFICATIONS & TRAINING

1. AWS Certified Solution Architect - Associate
2. Linguaskill (B1 Level, Average Score: 154) – Cambridge University
3. Oracle Cloud Infrastructure 2025 Certified DevOps Professional
4. Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- |                                                                                                 |                              |
|-------------------------------------------------------------------------------------------------|------------------------------|
| • <b>Vice President &amp; Treasurer</b> ,VEDA The Student Body of IRD Department, KL University | <i>Jan. 2025 - present</i>   |
| • <b>Co-lead</b> ,KL Researcher’s Club, KL University                                           | <i>Jul. 2024 - Jan. 2025</i> |

ACHIEVEMENTS

- |                                                                                                                                          |                    |
|------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| • <b>Guinness World Record</b> ,Took part in a Guinness World Records title for "The most participants in an agentic AI hackathon"       | <i>certificate</i> |
| • <b>SmartBreeze</b> ,AI-Based Cooler Stand, Design Patented Secured with 415552-001                                                     | <i>certificate</i> |
| • <b>AIC ALEAP WEHUB - Hackathon</b> ,AgriGrow is select for final round of hackathon conducted by Atal incubation center & ALEAP WEHUB  | <i>certificate</i> |
| • <b>Hackmol 6.0</b> ,A National-level 36 hours Technical Hackathon, NIT, Jalandhar, Punjab, India                                       | <i>certificate</i> |
| • <b>ICANEA-2024</b> ,An international conference ICANEA-2024 conducted by iNSERB & DST PURSE &dept of physics, KL Unversity, Vijayawada | <i>certificate</i> |
